WORK EXPERIENCE

Insight Fort worth, TX
Service Technician April 2026 – Present

- Architected dynamic Excel tracking models using `XLOOKUP` and spilled array formulas to automate real-time order queue updates, allowing new data to expand seamlessly and increasing daily team throughput.
- Developed custom VBA macros in Microsoft Excel to integrate with SAP systems, automating end-to-end manual data entry workflows and reducing processing cycle times by over 50%.

Hub Financial Irving, TX
Commercial Tracking Analyst September 2025 – April 2026

- Developed an Excel tracking architecture using `XLOOKUP` and `INDEX/MATCH` to aggregate document processing times across multiple departments, establishing core operational baseline KPIs.
- Audited commercial contract data and document processing queues to identify financial discrepancies, building Excel variance models that recovered 12% in uncollected fees and prevented processing delays.

PROJECTS AND INDUSTRY INVOLVEMENT

Homelab MTG Analytics Pipeline & Dashboard | Python, DuckDB, Apache Superset, Docker, Cloudflare

- Engineered an end-to-end data pipeline to parse and structure multi-gigabyte Scryfall JSONL datasets, processing historical printing records across decades of Magic: The Gathering card releases.
- Leveraged DuckDB for high-performance, in-memory SQL transformations to clean JSON attributes, calculate card legality vectors, and derive set-by-set distribution metrics.

Cloud-Based Speedrun Data Pipeline | Python, GCP, BigQuery, Cloud Storage, SQL, Tableu

- Developed a Python ETL pipeline to ingest and process 15,000+ Speedrun.com JSON records into structured Google BigQuery tables via daily automated cron jobs.
- Programmed validation scripts for schema normalization and automated file staging in GCS, feeding a Tableau dashboard for real-time player performance metrics.

Fighting Game Reaction Website | Python, Pandas, SQL, PostgreSQL (Supabase), TypeScript

- Engineered a TypeScript web application to capture millisecond-precise player reaction times across dynamic fighting game scenarios, backed by a Supabase PostgreSQL database.
- Architected a PostgreSQL database on Supabase using sequential BIGINT indexing for fast queries and UUID configurations for secure user authentication.

CERTIFICATIONS

Google Cloud Certified — Associate Data Practitioner | *Google Cloud* | Oct 2026

EDUCATION

University of Texas at Arlington Arlington, TX
Bachelor's of Science in Computer Science, GPA: 3.28/4.0 August, 2024
Relevant Coursework: Algorithms & Data Structures, Database Systems and File Structures, Artificial Intelligence

LEADERSHIP AND PROFESSIONAL DEVELOPMENT

Next Play Nation Basketball Arlington, TX
Sports Data Analyst Volunteer October 2025-January 2026

- Constructed custom Excel data models utilizing `XLOOKUP`, `INDEX/MATCH`, and dynamic array functions to streamline data retrieval and improve dataset accuracy by 24%.
- Leveraged Power Query and Pivot Tables to extract, transform, and clean raw data from team submissions, building dynamic summary reports to evaluate team-by-team performance.

SKILLS & INTERESTS

Languages: Spanish(Fluent) and English(Fluent)
Skills: Python | SQL | Data visualization | GCP | Git | Machine Learning | Microsoft Office Suite | Linux
Soft Skills: Communication, Collaboration, Fast-Learner, Problem-Solving, Leadership, Teaching
